bachelor
degree

**sustainable
business
for societal
challenges**

The main objective of the Degree in Sustainable Business for Societal Challenges concerns the management of the **economic and social changes currently occurring in society**, with a particular focus on the related challenges and opportunities.

The project employs innovative forms of teaching, with the adoption of **interactive and experimental learning methods** by involving students in a number of applications, laboratories and internships, and teaching the most recent technological tools of ICT.

Students will be able to specialize in specific **interdisciplinary areas** (such as business, management, chemistry and neuroscience) to successfully manage social innovation and spur social entrepreneurship.

The Degree is designed for **aspiring changemakers** to develop the skills and knowledge needed to bring a positive social impact in the external society and the environment, as well as a better inclusion of all agents with a particular attention to vulnerable groups (i.e., people with disabilities, migrants, individuals with gender identities, the elderly). The program is also aimed at helping students understand how manage the territory and the necessary resources to improve the well-being of the communities.

admission requirements

To be admitted to the first year of the program, applicants must:

- hold an **upper secondary school certificate**, or a qualification obtained abroad and recognized as suitable for admission to higher education, in accordance with the existing legislation regulations.
- Sit the **English TOLC-E**, a non-selective test for the verification of their knowledge. TOLC-E is an on-line multiple-choice test, different from candidate to candidate, and consists of automatically and casually selected questions. All generated tests are similarly difficult. It is composed of 36 questions divided into 3 sections: Mathematics, Logic, Reading Comprehension. Detailed information and the test schedule for the academic year 2023-24 will be available on the School's website. Students will not be able to take all the exam included in their study plan until they get the English TOLC-E test.
- Obtain an **English language certificate** at-testing at least a **B2 level** (CEFR).

aims aims

The Degree in Sustainable Business for Societal Challenges intends to form **future entrepreneurs and managers** of private and public companies, as well as national and international institutions and organizations, properly **prepared to face the current economic and societal environmental challenges.**

Students will learn to:

- manage the economic and social transition towards more modern and sustainable firms;
- manage new types of business activities, aimed at combining profit and social interests, such as technological development and environmental protection;
- start new companies aimed at creating a social impact, or contribute to the further development of existing firms, helping them to improve their social impact and sustainability.

In line with the professional profiles identified above, the potential **employment opportunities** involve the following:

- innovative start-ups with a social impact, with particular reference to those operating in the well-being sector;
 - large companies aimed at improving sustainability and the social impact, capable of implementing social and environmental programs, as well as policies for inclusion;
 - organizations of the Third Sector, as well as in national and international institutions and supranational public Government Bodies.
- 

what you
learn

The School of Economics and Management offers information and orientation services. **Tutorial service for potential students** helps students in the selection of a degree program, provide information about expected learning outcomes, learning activities and career opportunities and clarify any doubts.

Tutorial service for enrolled students aims to maximize students' University experience and provide information and guidance during their studies. Tutorial service for graduated students offers support to those who intend to continue their studies or alternatively approach the job market.

The School takes part in the **Erasmus Program** thanks to which students can study or do a traineeship in some foreign universities and companies, getting the recognition of the activities carried out abroad.

About **250 agreements with European Universities** and **20 agreements with extra-European Universities** (including Australia, China, Japan, USA, Canada and Latin American countries) allow about 330 students' mobilities per year.

The School also activates **Double Degree programs, joint study programs** between two or more universities. They allow students to **obtain two or more diplomas** that can be spent in their respective countries. More information is available on the School's website.

The School is deeply committed in offering equal opportunities of education to students with disabilities, in order to support and facilitate their integration within the University.

The service **UNIFI INCLUDE** offers assistance and support to these students.

what you
will do
 will do

In order to fulfil the objective of the program, the study plan is naturally grounded in the FAME (finance, accounting, management, and economics) subjects and the necessary mathematical and law
